GENERAL

This report is part of the Subject Report series and presents sample data from the 1980 Census of Population on Asians and Pacific Islanders for the United States, regions, divisions, States, selected standard metropolitan statistical areas (SMSA's), and certain other geographic areas of the United States (e.g., urban and rural portions of the United States). Data also are presented for: Chinese, Filipino, Japanese, Asian Indian, Korean, Vietnamese, Laotian, Thai, Cambodian, Pakistani, Indonesian, Hmong, Hawaiian, Samoan, Tongan, and Guamanian. In addition, the report presents figures for the total Asian population and for the total Pacific Islander population and by cultural group (Polynesian, Micronesian, and Melanesian). This is the first census to identify and provide data on the total Asian and Pacific Islander population and its subgroups.

The abbreviated identification for this report series is PC80-2 (i.e., Population Census, 1980–Volume 2) followed by a number and a letter representing the specific report.

A large portion of the information compiled from the 1980 Census of Population appears in Volume 1, *Characteristics of the Population,* which focuses on data for the United States, States, SMSA's, urbanized areas (UA's), counties, places, and other geographic areas. For a more complete description of the 1980 census data products, see "Appendix F.—Publication and Computer Tape Program."

Legal provision for this census, which was conducted as of April 1, 1980, was made in the Act of Congress of August 31, 1954 (amended August 1957, December 1975, and October 1976), which codified Title 13, United States Code.

The content and procedures of the 1980 census were determined after evaluation of the results of the 1970 census, consultation with a wide variety of census data users, and extensive field testing. A number of changes were introduced in 1980 to improve the usefulness of the census results. The changes do not, however, affect to an appreciable extent the comparability between the 1980 census data and the 1970 census data for most characteristics. Further information on comparability for specific subjects appears in "Appendix B.—Definitions and Explanations of Subject Characteristics."

The data presented in this publication are based on the 1980 census sample. The data are estimates of the actual figures that would have resulted from a complete count. The basic sampling unit for the 1980 census was the housing unit, including all occupants. For persons living in group quarters, the sampling unit was the person. Approximately 19 percent of the Nation's housing units were included in the census sample.

More detailed information on the technical and procedural matters covered in the text of this report can be obtained by writing to the Director, Bureau of the Census, Washington, D.C. 20233. Such information also appear in other publications of the 1980 census.

CONTENTS OF THE REPORT

Organization of the Report—This report contains text (this introduction and six appendixes), a table of contents, a table finding guide, and detailed tables.

Each detailed table is identified by a table number and title. The "stubhead" at the left under the title defines the types of geographic areas for which data are shown in the particular table and is considered part of the table title.

Appendix A describes area classifications. Appendix B provides definitions and explanations for the subjects covered in this report. Appendix C explains the residence rules used in counting the population and describes the data collection and processing procedures. Appendix D presents information on the sources of error in the data and editing procedures. Appendix E contains facsimiles of the respondent instructions and 1980 census questionnaire pages. Appendix F summarizes the data dissemination program of the 1980 census.

Content of the Tables—Table 1 presents data for the United States by urban and rural residence and inside and outside SMSA's. Tables 2 and 3 show data for the United States, regions, divisions, and States. Tables 4 and 5 present data for selected standard metropolitan statistical areas (SMSA's).

Table 1 in this report includes the most detailed racial distribution for Asians and Pacific Islanders. The residual category "All other Asian" includes groups not listed separately, such as Bangladeshi, Burmese, Sri Lankan (Ceylonese), and Malayan. The residual category "All other Pacific Islander" includes groups not listed separately such as Tahitian, Marshallese, and Fijian. In Tables 2 through 5, the residual categories "All other Asian" and "All other Pacific Islander" are not shown separately, but are included in the respective totals for total Asian, total Pacific Islander, and total Asian and Pacific Islander.

Tables 6 through 11 present demographic, social, and economic data for the total Asian and Pacific Islander population cross-classified by nativity for such characteristics as age, household relationship, education, language, citizenship and year of immigration, labor force, occupation,

and income and poverty for the United States and States and SMSA's with 25,000 or more Asian or Pacific Islander persons. Tables 12 to 137 show comparable characteristics for Asian and Pacific Islander subgroups and the total Asian and the total Pacific Islander populations. The criteria for showing the State and SMSA vary according to the population size of the group (For example, States with 10,000 or more Chinese, States with 2,500 or more Hawaiians). See Table Finding Guide for aid in locating tables for specific groups.

RELATED MATERIALS

1980 Census Reports—Information on Asians and Pacific Islanders is also found in selected tables in the following Volume 2 Subject Reports: PC80-2-4C, *Marital Characteristics;* PC80-2-4D, *Persons in Institutions and Other Group Quarters;* PC80-2-8B, *Earnings by Occupation and Education;* PC80-2-8D, *Poverty Areas in Large Cities;* and HC80-3-2, *Mobile Homes.*

Data on these population groups were provided in the Volume 1, *Characteristics of the Population* reports. Counts and characteristics such as age, sex, relationship, and marital status for the Asians and Pacific Islanders, based on 100-percent tabulations, were published in *Characteristics of the Population, General Population Characteristics,* PC80-1-B. The PC80-1-B reports were published for the United States and each State; data are shown for standard consolidated statistical areas (SCSA's), SMSA's, urbanized areas (UA's), counties, county subdivisions, and places of 1,000 or more inhabitants. Comparable housing data also were published in *Characteristics of Housing Units, General Housing Characteristics,* HC80-1-A.

Social and economic data such as family composition, education, labor force status, and income and poverty were published for the United States and each State in *General Social and Economic Characteristics,* PC80-1-C. Statistics for the total Asian and Pacific Islander population and its subgroups are shown for the United States and States; data for the total Asian and Pacific Islander population are presented for selected substate areas (counties, places of 2,500 or more, SCSA's, SMSA's, and UA's). Comparable housing data also were published in *Detailed Housing Characteristics,* HC80-1-B.

Detailed social and economic statistics cross-classified by age and other characteristics are presented for the total Asian and Pacific Islander population for the United States, and for selected States, SMSA's, and central cities of these SMSA's in *Detailed Population Characteristics,* PC80-1-D. Data generally are shown for the specified areas if there were 25,000 or more Asians and Pacific Islanders or if they comprised ten percent or more of the total population in the specified area. Comparable housing data also were published in *Metropolitan Housing Characteristics,* HC80-2.

Statistics for census tracts on most of the population and housing subjects were published for each SMSA and States which have tracted areas outside SMSA's in *Census Tracts,* PHC80-2. Counts for the total Asian and Pacific Islander population and nine Asian and Pacific Islander subgroups are shown for all census tracts. Characteristics were published for census tracts with 400 or more total Asian and Pacific Islander population. Counts and sample data comparable to those published in PHC80-2 on the Asian and Pacific Islander population were published for congressional districts for each State and the District of Columbia in *Congressional Districts of the 98th Congress,* PHC80-4.

Data are published for the Asian and Pacific Islander population in various reports in the 1980 Census of Population *Supplementary Report* series. The report PC80-S1-12, "Asian and Pacific Islander Population by State: 1980," based on sample tabulations, presents total population figures for the Asian and Pacific Islander population and its subgroups for the United States, regions, divisions, and States. Data are shown primarily on the total Asian and Pacific Islander population in the following Supplementary Reports: "Age, Sex, Race, and Spanish Origin of the Population by Regions, Divisions, and States: 1980," PC80-S1-1; "Race of the Population by States: 1980," PC80-S1-3; "Standard Metropolitan Statistical Areas and Standard Consolidated Statistical Areas: 1980," PC80-S1-5; and "Detailed Occupation and Years of School Completed by Age, for Civilian Labor Force by Sex, Race, and Spanish Origin: 1980," PC80-S1-8.

1980 Census Computer Tape Program—Results from the 1980 census also are provided on computer tape files in the form of Summary Tape Files (STF's). These products have been designed to provide statistics with greater subject and/or geographic detail than is feasible to provide in printed reports. STF's 1 through 5 present varying amounts of geographic and subject data on Asians and Pacific Islanders. STF's 1, 3, and 5 primarily contain data on the Asian and Pacific Islander population. STF's 2 and 4 have data on the Asian and Pacific Islander population and its subgroups. For a more detailed description of the content of these files, see "Appendix F.—Publication and Computer Tape Program."

Reports from Earlier Censuses—Statistics on the Japanese, Chinese, and Filipino populations were published in chapters B and D of 1970 Census of Population, Volume I, *Characteristics of the Population.* The population by sex for each of these racial groups, based on complete count data, is presented in Chapter B for the United States, its regions, divisions, States, SMSA's, urbanized areas, places, and counties. Age, sex, and nativity statistics based on the 15-percent sample for the Japanese, Chinese, Filipino, and Korean populations are shown for States in Chapter D. In 1970 census reports, data for Koreans are presented for the 49 States, excluding Alaska, and for the District of Columbia; data for Hawaiians are shown for Hawaii.

Information on the Japanese, Chinese, Filipino, Korean, and Hawaiian populations was published in the 1970 Volume II Subject Reports, *Japanese, Chinese, and Filipinos in the United States,* PC(2)-1G. Statistics on the Japanese, Chinese, and Filipino populations also are found in other 1970 Volume II Subject Reports, namely, PC(2)-3A, *Women by Number of Children Ever Born;* PC(2)-4C, *Marital Status;* PC(2)-5A, *School Enrollment;* PC(2)-7A, *Occupational Characteristics;* PC(2)-9A, *Low-Income Population;* and PC(2)-9B, *Low-Income Areas in Large Cities.*

Information for 1960 on the racial composition of the United States, regions, divisions, States, SMSA's, UA's, cities, and counties was published in 1960 Census of Population, Volume I, *Characteristics of the Population.* Data on the social and economic characteristics of the Japanese, Chinese, Filipino, and Hawaiian popula-

tions based on a 25-percent sample, were published in 1960 Census of Population, Volume II, PC(2)-1C, *Nonwhite Population by Race.*

In the 1950 census, data on the Japanese and Chinese populations for States were published in 1950 Census of Population, Volume II, *Characteristics of the Population.* Data on social and economic characteristics of the Japanese, Chinese, and Filipino populations are contained in the 1950 Census of Population, Volume IV, Part 3B, *Nonwhite Population by Race,* and of Japanese and Chinese in Volume IV, Part 5B, *Education.*

SYMBOLS AND GEOGRAPHIC ABBREVIATIONS

The following symbols and geographic abbreviations may appear in the tables:

- A dash "–" represents zero or a percent which rounds to less than 0.1.
- Three dots "..." mean not applicable, or that the data are being withheld to avoid disclosure of information for individuals. (For further information on disclosure, see the section below on "Suppression of Data for Confidentiality.")
- (NA) means not available.
- A minus sign (–) preceding a figure denotes decrease.
- A plus sign (+) following a figure denotes increase.

SUPPRESSION OF DATA FOR CONFIDENTIALITY

To maintain the confidentiality promised respondents and required by law, the Bureau of the Census takes precautions that its published data do not disclose information about specific individuals. To accomplish this the Census Bureau suppresses data for characteristics which are based on a small number of persons in the geographic area.

The general rules of primary suppression of sample data are as follows: estimates of total population by race and Spanish origin are never suppressed; other characteristics for persons are shown only if there are 30 or more persons in the geographic area; characteristics of families or households are shown only if there are at least 10 households or families within the geographic area. These primary suppression criteria are applied independently of one another. The comparable figures for complete count (100-percent) data are 15 or more persons and 5 or more housing units of the specified type.

Table Finding Guide
